Oh my neck, my back... OW! Help nurses prevent injury through standardized procedures

Project Litie	Oh my neck, my back OW! Help nurses prevent injury through standardized procedures
	Analyze safe patient handling equipment and create an easy-to-read standardized procedure which will ultimately improve care practices.
Country	United States

Project Description

The San Francisco VA Medical Center Office of High Reliability, Patient Safety and Nurse Education invites you to design a standardized operating procedure for our clinical staff. Procedure will include instructions on how to use safe patient handling equipment for intended purpose based on manufacturer's instructions. Standardizing the procedure will enhance efficiency and improve patient care
